

# TenderTripwire

**A tender changes.  
The review changes with it.**

An evidence-checking agent for small suppliers

Priyanshu Maheshwari  
BHARAT AGENTIC 2026

# The certificate does not cover Lot A

**Required: SOLAR-24**  
**Evidence: SOLAR-18**

The agent retrieves source lines, identifies the mismatch and checks the alternative lot.

**Lot B has matching evidence in this scenario**

The screenshot displays the TenderTripwire interface, which is used for verifying evidence before commitment. The interface is divided into several sections:

- Header:** TenderTripwire logo with the tagline "EVIDENCE BEFORE COMMITMENT". A status indicator shows "Synthetic data · recorded run" and a user profile icon labeled "TW".
- Lot A Summary:** A card titled "LOT A" with a "Mismatch" warning. It specifies "Outdoor learning-centre lights", "SOLAR-24 · 500 units", and "4/5 checks supported".
- Lot B Summary:** A card titled "LOT B" with a green "Evidence supported" status. It specifies "Study-room lights", "STUDY-12 · 300 units", and "5/5 checks supported".
- Lot B Evidence Checklist:** A detailed view of the evidence for Lot B, showing four categories, all marked as "SUPPORTED":
  - Product and specification:** "STUDY-12 and SYN-LIGHT-12-R1 match exactly." It lists evidence links: "Annexure B · p1:L3", "Annexure B · p1:L4", "Study cert. · p1:L3", and "Study · p1:L4".
  - Certificate holder:** "Certificate holder matches the supplier legal name." It lists evidence links: "Supplier · p1:L2", "Study cert. · p1:L2", and "Tender · p1:L3".
  - Certificate validity:** "Valid through the 2026-10-15 closing date." It lists evidence links: "Study cert. · p1:L5", "Tender · p1:L2", and "Tender · p1:L4".
  - Supply capacity:** "450 units/month stated; 300 units required. Supplier statement, not independently audited." It lists evidence links: "Supplier · p1:L4", "Annexure B · p1:L5", and "Tender · p1:L5".
- Source documents:** A section titled "CHECK THE ORIGINAL" showing "Source documents". It includes a "Product certificate · Study-room range" and a "Linked evidence" section stating "Study cert. · page 1, lines 4-4 · source verified".
- Supplier Evidence:** A section titled "SUPPLIER EVIDENCE" with a "SYNTHETIC" label. It displays a "Product certificate · Study-room range" with details:
  - Certificate-B · version 1
  - SHA-256: 006cec244ad1361f94...

The interface also includes a list of evidence items on the right side, numbered 01 to 07, providing further details about the synthetic product certificate and its validity.

# A new requirement revokes the old packet

The screenshot displays the TenderTripwire web application. The header includes the logo and tagline "EVIDENCE BEFORE COMMITMENT", a status indicator "Synthetic data · recorded run", and a "TW" button. The main content area is divided into two panels. The left panel lists requirements: "Supply capacity" (SUPPORTED), "Manufacturer authorization" (SUPPORTED), and "Lumen-maintenance test report" (MISSING EVIDENCE). The "Lumen-maintenance test report" section shows a message: "Corrigendum 01 adds a mandatory test report. No acceptable report is in the evidence pack." and a button "Corrigendum 01 · p1:L3-6". Below this, a "Previous packet revoked" message states: "The documents changed. Re-check and obtain a fresh approval before creating a new packet." and a "View recorded review" button. A dark blue banner at the bottom reads: "THE TRIPWIRE When the rules change, the decision should too. Corrigendum 01 is active. Earlier approvals and packets are invalid. The agent must check the current evidence again." and a "Corrigendum applied" button. The right panel shows a "CHECK THE ORIGINAL" section with "Source documents" and a dropdown menu showing "Corrigendum 01 · New mandatory test report". Below this, a "Linked evidence" section shows "Corrigendum 01 · page 1, lines 3-6 · source verified". The main document view shows a "REQUIREMENT CHANGE" header, a "SYNTHETIC" label, and the title "Corrigendum 01 · New mandatory test report". The document content includes: "Corrigendum-01 · version 1", "SHA-256: 1f585b9abbb74d9132...", "SYNTHETIC CORRIGENDUM 01 — Tender TT-2026-017.", "Published: 2026-10-01. Effective immediately for both lots.", "Clause C1. In addition to existing requirements, Lot B must include a lumen-maintenance test report for STUDY-12.", "Required report standard: SYN-LUMEN-12-2026", and "Clause C2. Existing preparation checklists must be re-evaluated. Earlier approvals and packets are stale."

## New document

## Lot B now needs a lumen-maintenance test report

The report is missing.  
Approval expires and the  
previous ZIP can no longer  
be downloaded.

# A small model with verifiable safeguards

104

**automated checks passed**

Citation integrity, stale approvals,  
repeated requests, ZIP contents and  
document-injection defenses

## Genuine local inference

Qwen3-1.7B on CPU  
No paid API account required

Real model completed in 134 seconds  
inside a 2 CPU, 4 GiB container

Bounded model planning with deterministic  
validation and human approval

# A focused pilot with small suppliers

## First users

**Suppliers who prepare repeated bids with a small back-office team**

## Proposed business model

Pay per reviewed packet or a monthly subscription

## What a pilot would measure

Missed requirements  
Time to assemble evidence  
Incorrect ready decisions

Next: broader document formats, real supplier feedback and independently labelled tender cases
